# VIKING WIND

---

Sustainable Adaptable Renewable

A close-up photograph of a white Viking Wind turbine nacelle and tower against a clear blue sky. The nacelle has the word 'viking' written on it in a lowercase, sans-serif font. The tower is a thick, grey metal pipe. The nacelle is connected to the tower via a large, white, cylindrical component.

# ROBUST DANISH WIND TURBINE DESIGN

---

- The Viking household wind turbine is based on the robust and well-known Danish concept
- The turbines are type-approved and meet the international standards
- The turbines are delivered with a 2-year warranty on all components
- The Viking wind turbines are compatible with stand-alone systems / off-grid systems
- The Viking wind turbine can collaborate with existing energy solutions such as solar, diesel generator and storages solutions

---

At Viking Wind, many years of experience from the industry for wind turbines is accumulated and put into good use when it comes to advising our customers

---

# EASY INSTALLATION AND MAINTENANCE

## EASY TRANSPORT

The Viking turbine is designed for easy transport and installation: 3 complete turbines in a 40" container

## FUNCTIONAL DESIGN

The tilt tower gives the possibility to erect and derect the turbine. Operating time for lay down: from start to end is 15 minutes.

## AESTETIC APPEARENCE

With the three blades design, the turbines have the same majestic look as the large MW turbines
